

How to access remote learning at BOA

This week your remote learning will be managed via Microsoft Teams. The Microsoft Teams app can either be downloaded from www.office.com on a laptop or desktop computer, or from the app store on a mobile device.

Sign in using your BOA Academy user name and password. E.g. Billy.Adams@Boa-academy.co.uk.

Your remote learning experience will take the form of live video lessons and will follow your normal timetable.

A link to your live lessons and resources will be posted on the wall of each virtual classroom (team) in advance. To join the lesson at the prescribed time, click the join button in the description.

Provided you are logged in to teams, you should also get a prompt to join the lesson once it begins.

Your teachers will give you a choice as to whether you complete work on paper or on the computer. We don't mind which approach you take, but you must upload evidence of your work when requested. Photos of handwritten work are fine.

If you have any issues logging in to MSTeams please contact ITHelp@boa-academy.co.uk

If for any reason you miss a live lesson, the resources will be available in your virtual classroom so you can work through the class materials independently. However please note that our expectation is that all students attend the live video lessons where possible.
